PROFESSIONAL SUMMARY

Senior engineering and delivery leader with 20+ years of experience, currently leading one of the largest Risk & Compliance Transformations in UK telecom. Driving BT Group's GRC platform strategy across 12 Group Risk Categories, governing 12,000+ metrics and controls, engaging 200+ stakeholders from ExCo to operational teams, and operating across all three lines of defence (Business, Risk, Audit). Leading compliance transformation spanning TSA, PCI DSS, NIS2, GDPR, ISO 27001, NIST, DORA, and SOX frameworks. Managing a £8M programme that has automated 2,200+ controls, transformed 50+ compliance processes, and delivered £3M+ YoY savings with a team of 160+ across 5 vendor partners. Seeking Senior/Director-level positions to lead complex GRC and enterprise technology deliveries.

TRANSFORMATION & LEADERSHIP

When I took ownership of BT Group's Risk & Compliance platform, the landscape was fragmented — 12 Group Risk Categories managed through a patchwork of Salesforce, SAP GRC, OneTrust, and dozens of manual processes accumulated over two decades. The mandate was bold: consolidate everything into a single, intelligent platform. Replace the irreplaceable. Simplify what the industry considers inherently complex.

I assembled and led a cross-geography team towards what many considered an impossible goal — building an enterprise-grade GRC platform from the ground up while simultaneously decommissioning entrenched SaaS tools that entire business units depended on. This required not just technical execution, but relentless stakeholder alignment across 200+ people from ExCo to front-line operations, spanning all three lines of defence.

The programme now governs 12,000+ metrics and controls across TSA, PCI DSS, NIS2, GDPR, ISO 27001, NIST, DORA, and SOX — transforming how 85,000 people experience compliance. What previously took teams days now takes minutes. What required 27 tools now needs 2. What was manual is now automated.

- Replaced Salesforce, SAP GRC, and OneTrust with a purpose-built platform — in-house, at pace, at scale
- Automated 2,200+ cyber compliance controls; reduced 117 operational controls to 12
- Transformed 50+ GRC processes across 12 Group Risk Categories in a single year
- Delivered £3M+ YoY savings while managing an £8M programme budget
- Pioneered AI in SDLC — delivered a full Business Continuity Management app in 2 weeks with 2 people
- Passed ISO audits with distinction; established KPIs, OKRs, and QMS as the delivery standard
- Migrated on-prem to AWS, decomposed monoliths to microservices — modernising the entire tech stack

BT Group (British Telecom) 2013 – Present · 12+ years

Senior Manager — GRC Platform Delivery 2022 – Present

- Own platform delivery for BT Group's Risk & Compliance Management strategy, transforming GRC processes and tooling across the enterprise
- Govern 12 Group Risk Categories across all BT horizontals and verticals
- Manage 12,000+ metrics and controls — monitored, automated, and governed on a single platform
- Engage 200+ stakeholders from ExCo to operational teams across all three lines of defence
- Lead compliance transformation for TSA, PCI DSS, NIS2, GDPR, ISO 27001, NIST, DORA, and SOX
- Lead 30 FTEs (India & UK) and 130 subcontractors from 5 vendor partners
- Manage £8M programme budget; delivered £3M+ YoY cost savings
- Automated 2,200+ cyber compliance controls through purpose-built platform capabilities
- Introduced AI-assisted processes to streamline compliance workflows and risk assessments
- Transformed and automated 50+ GRC processes, replacing Salesforce, SAP GRC, and OneTrust
- Strengthened data controls and simplified ICOFR reporting across BT Group
- Established KPIs, OKRs, and QMS aligned to ISO standards; passed audits with distinction
- Led infrastructure transformation from on-prem to AWS; migrated monoliths to microservices
- Adopted AI in SDLC — delivered a full Business Continuity Management application in 2 weeks with 2 people

Engineering Manager — MySD & AIB 2017 – 2022

- Led the transformation to simplify the Order Orchestration journey for BT Global business with product MySD
- Launched end-to-end services including SD-WAN and rolled out key features on VPN and Broadband services
- Resolved inter-component conflicts and simplified design across complex service chains
- Led end-to-end SDLC for BT Global's Service Delivery technology stack
- Drove technology transformation, environment migrations, and COTS-to-custom replacements
- Set up delivery KPIs and governance for cross-functional engineering teams
- Led cloud adoption — migrating on-prem workloads to AWS infrastructure
- Decomposed monolithic applications into microservices for scalability and resilience

Specialist Lead Developer → Design & Development Lead 2013 – 2017

- Led design and development for order orchestration and order management systems
- Solved complex problems in technology transformation and tool migration
- Progressed through multiple roles driving increasingly complex delivery

Oracle 2008 – 2013 · 5 years

Senior Consultant — Telecom Products 2010 – 2013

- Worked with service integrators to implement end-to-end telecom OSS/BSS solutions
- Installed Vodafone's production Order Management system for B2B
- Collaborated with Huawei on OSS stack implementation
- Travelled to client locations to solve complex integration challenges

Senior Developer — Telecom Products 2008 – 2010

- Contributed to product development in Java for Order Management and Inventory Management
- Delivered key features for Oracle's telecom services product suite

Virtusa & iMany 2005 – 2008 · 3 years

Software Developer

2005 – 2008

- Campus hire at Virtusa; developed enterprise software solutions
- At iMany (US): contributed to contract management tool, feature delivery, and production migrations

CORE COMPETENCIES

Leadership & Delivery

Large-Scale Programme Delivery, E2E SDLC Leadership, Multi-Vendor Coordination, Financial & Budget Mgmt (£8M+), Stakeholder & ExCo Engagement, People Leadership, Cross-Geography Teams, Delivery Predictability & OTD

Technical & Architecture

Technology Transformation, Cloud & AWS Migration, Microservices & API Architecture, DevOps & CI/CD, Platform Modernisation, AI-Driven Development, DORA Metrics, Integration Design

Governance & Compliance

GRC Strategy & Transformation, ISO 27001 / SOX / NIST / TSA, RAID & Risk Mgmt, Release & Change Governance, ISO QMS, Cyber Compliance Automation

Methodologies & Certs

Lean & Agile (SAFe), PMP, CSM, Kanban, Continuous Improvement, OKR & KPI Frameworks

ABOUT ME

Outcome-Driven

I lead with outcomes, not activity

Transformational

I turn complexity into structured delivery

People-First

Trust, clarity, purpose build great teams

Continuous Learner

20+ years and still growing

Globally Connected

Teams, geographies, vendors connected

Execution Discipline

Strategy without execution is just a deck

EDUCATION & CERTIFICATIONS
