

Lovekeshwar Ranga (aka LK)

Senior Engineering & Delivery Leader | Enterprise GRC Platform | Director-level Programme Delivery

Bangalore, India lovekeshwar@gmail.com LinkedIn

PROFESSIONAL SUMMARY

Senior engineering and delivery leader with 20+ years of experience driving complex, large-scale enterprise programmes across telecom, risk, and compliance domains. Currently leading BT Group's Risk & Compliance Management platform strategy — a £8M programme delivering £5M+ YoY savings — with a team of 160+ across 5 vendor partners and multiple geographies. Proven ability to own end-to-end enterprise delivery, establish KPIs and OKRs, implement Quality Management Systems aligned to industry standards, and pass ISO audits consistently. Seeking Senior/Director-level positions to lead complex enterprise and large-scale technology deliveries.

PROJECT DELIVERY & ENTERPRISE LEADERSHIP

- Led end-to-end enterprise delivery for programmes spanning £8M+ budgets with 160+ team members across geographies
- Established KPIs and OKRs to monitor delivery health, track progress, and drive accountability
- Implemented Quality Management Systems (QMS) aligned to industry standards
- Passed ISO audits multiple times with distinction, demonstrating sustained compliance excellence
- Set up governance frameworks for multi-vendor, multi-geography delivery models
- Drove technology transformation, COTS-to-custom replacements, and environment migrations at enterprise scale
- Aligned 15 Group Risk Categories to a unified compliance and risk management toolset

KEY ACHIEVEMENTS

- Built an in-house GRC platform with £8M funding, delivering £5M+ YoY savings for BT Group
- Consolidated 50+ risk and compliance processes onto a single unified platform
- Replaced Salesforce, SAP GRC, and OneTrust with a purpose-built enterprise solution
- Installed Vodafone's production Order Management system for B2B
- Delivered complex OSS/BSS integrations with Huawei using Oracle and third-party products
- Transformed BT Global's Service Delivery technology stack end-to-end
- Migrated on-prem infrastructure to AWS; decomposed monoliths into microservices
- Delivered a BT Group Business Continuity Management app in 2 weeks with 2 people using AI-driven Spec Development

CAREER HISTORY

BT Group (British Telecom)

2013 – Present · 12+ years

- 
Senior Software Engineering Manager — GRC Platform Delivery 2021 – Present
 - Own platform delivery for BT Group's Risk & Compliance Management strategy
 - Lead 30 FTEs (India & UK) and 130 subcontractors from 5 vendor partners
 - Manage £8M programme budget; delivered £5M+ YoY cost savings
 - Consolidated 50+ legacy processes; replaced Salesforce, SAP GRC, and OneTrust
 - Established KPIs, OKRs, and QMS aligned to ISO standards; passed audits with distinction
 - Collaborate with 15 Group Risk Categories to align tooling and process requirements
 - Led infrastructure transformation from on-prem to AWS; migrated monoliths to microservices
 - Built systems for reliability and resilience on cloud-native AWS infrastructure
 - Adopted AI in SDLC — delivered a full BCM application for BT Group in 2 weeks with 2 people
- 
Engineering Manager — Service Delivery 2017 – 2021
 - Led end-to-end SDLC for BT Global's Service Delivery technology stack
 - Drove technology transformation, environment migrations, and COTS-to-custom replacements
 - Set up delivery KPIs and governance for cross-functional engineering teams
 - Led cloud adoption — migrating on-prem workloads to AWS infrastructure
 - Decomposed monolithic applications into microservices for scalability and resilience
- 
Specialist Lead Developer → Design & Development Lead 2013 – 2017
 - Led design and development for order orchestration and order management systems
 - Solved complex problems in technology transformation and tool migration
 - Progressed through multiple roles driving increasingly complex delivery

Oracle 2008 – 2013 · 5 years

- 
Senior Consultant — Telecom Products 2010 – 2013
 - Implemented end-to-end telecom OSS/BSS solutions with service integrators
 - Installed Vodafone's production Order Management system for B2B
 - Collaborated with Huawei on OSS stack implementation
 - On-site delivery solving complex integration challenges across teams
- 
Senior Developer — Telecom Products 2008 – 2010
 - Product development in Java for Order Management and Inventory Management
 - Delivered key features for Oracle's telecom services product suite

Virtusa & iMany 2005 – 2008 · 3 years

- 
Software Developer 2005 – 2008
 - Campus hire at Virtusa; developed enterprise software solutions
 - At iMany (US): contract management tool development, feature delivery, production migrations

| • Enterprise Programme Delivery | • Engineering Leadership (160+) | • KPI/OKR & Governance |
| • Quality Management (ISO) | • GRC Strategy & Platforms | • Budget Management (£8M+) |
| • Telecom OSS/BSS | • Stakeholder & Vendor Mgmt | • Technology Transformation |
| • Agile / SAFe at Scale | • AWS & Cloud Infrastructure | • Microservices Architecture |
| • AI-Driven Development | • SDLC & DevOps | • Cross-geography Leadership |

ABOUT ME

Lifelong Learner & Explorer

20+ years in and still learning, still thriving. Curiosity drives me to stay ahead — from telecom to AI-driven transformation.

People-First Leader

Employees are the biggest asset. I build teams where people are happy, motivated, and cheering each other on.

Outcome-Driven

Leading with purpose — aligning teams towards common goals, driving accountability, turning vision into outcomes.

Culture Champion & AI Advocate

Driven AI adoption to reimagine processes, elevate roles, and boost productivity across the organisation.
